

ELECTRONIC PIZZA!!!

What the @%&#! is Electronic Pizza?

"Electronic Pizza" was founded in 1984 to provide an informal monthly forum for engineers, technicians, consultants, and entrepreneurs to discuss their efforts to exploit the latest electronic technologies in areas such as broadcast and cable TV production, electronic imaging, information processing, telecommunications, testing & measurement, etc. Use this opportunity to network with "techies" and other individuals involved in high-tech development in Hawaii.

The Pro's and the Con's of the Honolulu High Capacity Transit Corridor Project - Part Two – The Con's

Panos D. Prevedouros replies!

On Tuesday, March 4, Simon Zweighaft and Kenneth (Toro) Tamayashi presented the case for the steel on steel train to a highly informed and very inquisitive audience. On Tuesday, March 11, Panos Prevedouros will present the other side of the discussion. It's sure to be a very interesting, and if last week is any indication, a very vocal and participatory time. This major project is not a "done deal," and it affects all of us. **Bring your questions and bring your self.**

Panos D. Prevedouros, PH.D. is the Professor of Traffic and Transportation Engineering at the Department of Civil and Environmental Engineering of the University of Hawaii at Manoa. Dr. Prefedouros served in the Trasit Advisory Task Force in 2006 and in the Technology Selection Expert Panel in 2008 of the City Council of Honolulu. As part of the task force he has been the lone dissenting voice against the train system. You can't have a complete understanding of the issue unless you hear his arguments. For more details on Dr. Prevedouros' extensive expertise, check out <http://www.eng.hawaii.edu/~panos/>.

Mark your calendar now and be sure to join us on Tuesday, March 11, 2008.

Sign up and receive free parking by sending an email with your name and phone number, before noon on Tuesday, to Courtney Brown <cyberpizza@gmail.com>

Tuesday, March 11, 2008

Doors open at 5:45pm; program begins at 6:00pm Marine Science Auditorium Room114 -- UH Manoa Campus

For questions call Eran Agmon at 831-0600 or Courtney Brown at 780-9000
