– Panel No. 3

Tuesday, June 20, 2006
9:00am to 11:30 p.m.

Hawaii State Capitol, Conference Room 329
(Light refreshments)
No admission charge

Transportation Options for Cities

An Expert Panel Discussion to Make Sense of it All

Everyone travels, so we all intuitively understand transportation systems. But many things about transportation are not intuitive, and the answers to some basic questions can be rather surprising:

- How do transportation investments affect the economy?
- What are the rationales for public investment in transportation?
- How can we balance needs for political fairness with economic efficiency?
- What kinds of investments tend to deliver the most transportation bang for the taxpayer buck? And which the least?
- What are some recent examples of high "bang-for-the-buck" transportation investments from around the U.S. and the world?

Program

9:00am to 11:30am
No admission charge

Panelists:

Professor Brian Taylor, Ph.D., AICP, Associate Professor and Vice-Chair of Urban Planning, UCLA & Director, UCLA Institute of Transportation Studies.
